

Education

Thessaloniki, Greece	University of Macedonia	Sep 2015 Sep 2019
----------------------	-------------------------	---------------------

- BS in Computer Science. GPA: 3.7. Dissertation: Playing Atari Games with Deep Reinforcement Learning. Exploring Deep Q-Learning and A3C algorithms.

Work Experience

Software Engineer	Bitwise Group	Mar 2024 – Present
-------------------	---------------	--------------------

Dumferline

- Developing a software using C# for managing remote Virtual Machines running medical applications.
- Writing documentation and specification client documents.

Game Developer	Legendary Play	Oct 2022 – Feb 2022
----------------	----------------	---------------------

Remote

- Implementing gameplay features as services in .NET Core for the Idle RPG game "Esports Heroes".
- Adding interactive UI screens in Unity from Figma designs.
- Connecting the UI with the server using gRPC and Protobuf messages.
- Keeping the UI decoupled from the data using Model-View-Presenter and Reactive Programming.
- Making CSV parsers and integrating Game Design data into the game's logic.
- Leveraging Test-Driven Development using XUnit and FluentAssertions.

Unity Developer	Luminous Group	Apr 2021 – Jul 2022
-----------------	----------------	---------------------

Remote

- Implementing a visual programming tool for designing XR processes from the Unity Editor.
- Adding XR behaviour in Unity using OpenXR and MRTK SDKs.
- Integrating the core multiplayer system using Photon Network.

Junior Game Developer	Traptics	Oct 2020 – Feb 2021
-----------------------	----------	---------------------

Remote

- Developing gameplay features in Unity for an array of casual mobile games released in Google Play and App Store.
- Implementing AI behaviour from Game Design specifications.

Skills

-
- Advanced: C#, Unity Engine, .NET Framework, TDD, SOLID principles, Design Patterns
 - Intermediate: Python, C++, .NET Core, Entity Framework, Java, HTML
 - Beginner: Unreal Engine, Javascript, CSS, C

Personal Projects

-
- **Dungeon Roguelike** 2D Roguelike mobile game in Unity, with a team party system.
 - **TriviYES!** Trivia mobile game in Unity using REST API for retrieving the questions. Released for Google Play.
